Chapter Excerpt from

A LAW of ATTRACTION BOOK FOR CHILDREN THE STAR POWERED TWINS DISCOVER THE SECRET OF WORDS

by Dorothy Lecours

## FOCUS

Dot and Bill Star were always finding places that their INNER BEING would enjoy seeing. They would always relax outside as they carefully thought about what sights they would allow to go INSIDE their twins. The setting of WATER and NATURE always inspired creative ideas and an inner connection. They knew that all power lives within. They always told their children to FOCUS on what they LOVED to do. So, they could ATTRACT all those wonderful things into their life. They wanted their children to learn how to really FEEL what made their heart overflow with gratitude and this would always lead them to their true purpose. To always BE in the "NOW" moment of time was the greatest secret of all they could ever teach Jace and Grace. NATURE

Grampie Wilfred always made sure their EYES and EARS focused on the beauty of nature. He taught them how to DEEP BREATH and just be still with the flowers, trees, sky, and the exquisite lake that surrounded their home. On a sunny day, the little waves of water on the lake looked like dancing stars. They would always silently say THANK YOU when they saw something beautiful or felt joy! The music of Mother Earth was their greatest love of all. Their EARS always heard an abundance of the lovely sounds of birds, wind chimes, splashing water, and twirling leaves. Grampie taught those birds how to sing to us! The unique sound of each bird was pure magic to our ears! We always listened to their vibrant musical messages and tried to put words to each of their delightful songs.

## CREATE

Nanny Alice is creating an AROMA THERAPY LESSON for the twins. She knows that the five senses are the incredible doorways to a deeper understanding of oneself. Expansion of the five senses keeps us OPEN and AWARE of finding our inner sense. Nanny Alice loves to get creative with her star-shaped cutter to make heavenly sugar-free treats. The twins smelled and tasted only foods that were tantalizing, blessed, and extremely healthy. She loved to create star burgers, \*marshmallows, \*fruit, \*cakes, \*jello, \*lollipops, \*candy, \*cookies, and \*cupcakes. Each \*treat has a very unique aroma. Nanny Alice used many secret ingredients for her multi-sensory lesson.

Can you find the word that matches with the picture of each sugar-free star treat?

## ALLOW

Grace and Jace were surrounded with fragrances that would make their cute little noses sniff and twitch with delight. The air in the kitchen was filled with the delicious scents of vanilla, rose petals, chocolate, peppermint, basil, ginger, lavender, and carrot. All the nerves in their noses began to send brilliant food messages to their brain. Grace and Jace loved to try and guess all the star treats by using only their sense of SMELL. ALLOW your imagination to SNIFF all the \*treats! The twins could hardly wait for their blindfolded TASTING party!

## DESIGN

Grace and Jace's mom, Dot, was a jewelry designer. She would make starry necklaces, key chains, rings, earrings, bracelets, and belts in gold and silver. Mom made sure each of her designs was filled with crystals and a power word. Each piece of jewelry created rainbows to swirl and dance whenever and wherever the SUN appeared. They loved learning the new power word their mom would choose each day! Her most creative design was a sun catcher necklace, worn in the middle of the chest area. Each twin could hardly wait to have their own necklace. They wanted to experience the magical feeling of the rays of the SUN when it touched the crystal sitting on their HEART energy center. The incredible light would make them feel hugged from the inside out.

## ACTION

Welcome to our grandfather's workshop filled with custom made hand tools, glass, and imagination. Grace and Jace's grandfather George Francis was a very skilled man who endured tremendous heat to coax beautiful forms of glass to life in a roaring furnace. He used nothing more than his own breath and a few simple tools to produce incredible art forms. He was a glassblower who captured the beauty of a rose by encasing it in exquisite glass. He wanted the world to see the perfect green star on the bottom of this precious flower. The possibilities of shaping glass

into desired forms were endless.

## ART

Grandfather George taught his children Serry, Mary, George, and Bill how to make their own unique flower and fruit glass designs. Uncle George would slice an apple in half to show the hidden star inside and blow glass all around it so it would last forever. Uncle Serry and Aunt Mary would find all those beautiful star-shaped flowers that were a reminder of their true HOME. Their family always felt honored to have the last name Star! They wanted to create incredible lasting works of art to make the world AWARE of where we all came from before their visit to Earth. Their father Bill would blow different shapes of glass and put the magic words inside with a star-shaped flower. The words carry a magical vibration through the air. Dad would have them repeat the words over and over again until their bodies felt the power of LOVE inside and out.

## FUN

Grace and Jace loved to play with their DAD, the greatest bubble maker! When they were three he bought, Grace and Jace an enormously large star bubble wand that fits in their kiddie pool. On a hot, sunny day, their dad filled our pool with liquid soap and water. He taught them the first of many lessons on the magic of using their BREATH to create BEAUTY. He could create bubbles within bubbles that made us laugh and smile! He was able to make huge bubbles that would cover their whole bodies and tickle them until they POPPED!! Oh, what fun they had! Pop also used, bubbles to teach them how to see what their FEELING VIBRATION looked like. He blew a big bubble around each twin. He would ask Jace to think only angry thoughts, and the bubble would become very dark. Then, he would ask Grace to think only happy thoughts that made her smile and laugh. Her bubble would look like a magical rainbow. Pop explained that you can only be in a positive or negative FEELING VIBRATION. The UNIVERSE always gives you a perfect match for how you are FEELING. He also taught Jace and Grace the way to change a person's vibration by just asking, "So, what do you really WANT?" The secret to creating a beautiful vibration are delicious WORDS that make you FEEL awesome! His bubble lessons were the greatest adventures!

## DANGER

Grace and Jace also learned the words they were never allowed to use. Those words are: DON'T, CAN'T, NO, and NOT. They always remembered, the day Grandma Molly dragged out an old scary pirate box from underneath her bed. Pirates liked to use pictures instead of words. They could see a GIGANTIC LOCK on the box with TWO SKULLS with LONG CROSSED BONES, which was the symbol for DANGER and POISON. We were finally ready to peek inside to see those NEVER ALLOWED words: DON'T, CAN'T, NO, and NOT.

We could hear the most painful sounds as the box began to open. Our ears began to hurt! All we could hear was the message POISONOUS WORDS! The words were sitting as still as death at the bottom of the box. Grandma Molly told them in a very stern voice to ELIMINATE and DELETE these words because they will only create the opposite of what you want to happen. The UNIVERSE wants you to ERASE the words DON'T, CAN'T, NO, and NOT from your vocabulary.

She made them memorize these POISONOUS words until the twins felt that each word was burned into their memory as a painful reminder to NEVER EVER use them. ELIMINATE

If they made a mistake and used any of those NEVER to USE WORDS, they would get the LOUD WARNING sound from Grandma Molly. She sent them right to the bathroom toilet to FLUSH, FLUSH, FLUSH, and FLUSH away all those words to where they belonged!

Sometimes those words slipped into their sentences, and Grandma Molly would make them give her a dime from their star bank every time. Plus a trip back to the toilet to FLUSH, FLUSH, FLUSH, and FLUSH all those words to where they belonged! Gram Molly gets A++++ for deleting all those never to use words from their vocabulary and thoughts.

## READ

The twins had fabulous bedrooms filled with all their favorite things. Jace loved space, so he had a spaceship bed to BLAST OFF in for all his incredible evening explorations. Grace loved the water, so she had a sailboat bed to FLOAT away in each night for all her fabulous water adventures.

Their pop's mother Molly was a reading teacher and read to the twins twice a day. Jace could magically SLIDE DOWN to join us for story time. They loved their Grandmother Molly tremendously for making words come alive for them. Gram Molly wallpapered, Grace and Jace's bedroom walls with all the WORD FAMILIES. What a sight! Grace and Jace's greatest wish was to learn how to read. Grandmother Molly put the love of rhyming words into their hearts. Grace and Jace were ready to become excellent readers because they learned how to rhyme with every word family.

Can you read all the word families on their wallpaper?

Grace and Jace always loved to DISAPPEAR into a GOOD BOOK. They let each book take them on a MAGIC CARPET
